

FIDDDES FLOOR CARE

CONGRATULATIONS ON YOUR NEW FLOOR!!

You have made a wise decision to choose Fiddes Hard Wax Oil to coat your new floor! Now you need to ensure you care for and protect your floor to extend the life of your finish.

Hard Wax Oil is a blend of natural oils and waxes offering exceptional durability and resistance for internal timber surfaces and flooring. To keep your floor looking its best, we suggest a combination of floor protection on all your mobile furniture in conjunction with regular cleaning to remove dirt and grit, which can cause fine scratching and wear on your floor. We recommend a broom or electrostatic mop. If using a vacuum cleaner, please ensure the head will not scratch your floor.

We recommend the use of Fiddes Floor Surface Cleaner as required. The Surface Cleaner should be diluted in water as per the instructions on the bottle. This is a non-abrasive rinse free formulation suitable for all types of pre-finished timber flooring. Apply using a mop ensuring you do not oversaturate the floor. Remove any excess and allow to dry.

Fiddes Floor Reviver Kits are also available to assist in the removal of light surface marking. Please follow the instructions on the product when necessary.

Do not under any circumstance use bleach, ammonia or caustic based cleaners to clean your floor. This is very important as these products will strip or weaken the coating and could cause colour distortion and the high likelihood of staining.

For Fiddes Floor Surface Cleaner and Reviver Kits please contact your flooring professional or contact Fiddes Australia directly. Floor Protection is currently available exclusively via our website.
